Pranav Industries, is a family owned manufacturing enterprise with a steady grown of 1000% over last 12 years. Rich in experience and gifted with business skills the president of the industry has set himself goals with a long horizon. Starting with sharing manufacturing capacity and catering to local markets way back in 1999, the company has today registered a sizable growth in a product mix of specialized blacks. The company has decided to keep product line steady and indirectly share her skills and capacity to large consumers and traders in the domestic as well as in the overseas market.

After years of research and assessing the manufacturing product mix, the company has now decided to restrict her activities to the seven specialty products as in the product brochure presented.

The brochure is indicative about the quality parameters that are carefully looked into by the company, not limiting to the some routine matters. The company is also capable of independently analyzing all required parameters of her products, as required in the commercially awakened eco friendly business nature.

The company has a manufacturing capacity to produce 4800 MT of Reactive dyestuff listed on the product information brochure. We are looking forward to cater to the bulk buyers both from manufacturing and reselling segment of market.

For any further information please feel free to contact us.
